

PROJECT

## COMPOSITE TRAINING FACILITY

CLIENT

AUK

CONTRACT VALUE

£900K

Design and Build

## OBJECTIVE

Hollingsworth Ellery were selected to carry out the high specification internal fit out works to an existing industrial unit.

The project provided a training facility that will be shared with Glyndwr University laboratories and AUK's specialist training for carbon composite wings.

The required shared and individual training areas were arranged best to fit the industrial unit.

As well as space arrangement of the facility designers were required to meet building regulation requirements and consider hand back of the facility on the expiry of the lease.

To ensure the facility is fit for purpose Hollingsworth Ellery's design development should ensure engagement with all stakeholders.

## METHOD

After finalising and gaining approval of the proposed internal layout including incorporation of complex Mechanical and Electrical design works. Hollingsworth Ellery commenced construction of numerous lecture theatres, IT facilities, mess and toilet facilities.

As the project developed Hollingsworth Ellery gained the trust of all stakeholders and subsequently had variations approved for the fit out of the laboratory and technical training workshop as well as additional car parking space.

This included Hi tech carbon filtration extraction equipment, presentation media and coordinating incoming supplies on behalf of Airbus.

## RESULTS

The completed project provides a modern training facility for both AUK and Glyndwr university the opening ceremony being a televised event.

The project was completed on time and on budget, Hollingsworth Ellery. The facility has subsequently hosted visiting overseas dignitaries and has become an award winning facility.

## SUMMARY

Carwyn Jones, the First Minister of Wales, opened the Advanced Composite Training and Development Centre in Broughton that will help thousands of Airbus apprentices and employees in the UK to develop and improve their composite manufacturing skills.

Ivan Davies, AUK Project Manager commented 'Another successful HE project, feedback comments from senior Airbus management and Welsh government visitors have been superb and all are delighted to be associated with such a facility'
